Attorneys for Defendant  
RENAISSANCE LEARNING, INC.

UNITED STATES DISTRICT COURT  
CENTRAL DISTRICT OF CALIFORNIA  
SOUTHERN DIVISION - SANTA ANA

M.C. 1 and M.C. 2, by and through their  
legal guardian NICOLE REISBERG,  
and M.C. 3 and M.C. 4, by and through  
their legal guardian AMY WARREN,  
individually and on behalf of all others  
similarly situated,

Plaintiffs,

v.

RENAISSANCE LEARNING, INC.,

Defendant.

Case No. 8:25-cv-01379-FWS-JDE

**DEFENDANT RENAISSANCE  
LEARNING, INC.'S NOTICE OF  
MOTION AND MOTION TO DISMISS  
PLAINTIFF'S FIRST AMENDED  
COMPLAINT; MEMORANDUM OF  
POINTS & AUTHORITIES IN SUPPORT**

Date: February 5, 2026  
Time: 10:00 a.m.  
Courtroom: 10D

Pretrial Conference: March 9, 2028  
Trial Date: April 4, 2028

1 TO PLAINTIFFS AND THEIR ATTORNEYS OF RECORD:

2 PLEASE TAKE NOTICE that on February 5, 2026 at 10:00 a.m., in  
3 Courtroom 10D of the U.S. Courthouse located at 411 West 4th Street in Santa Ana,  
4 California 92701, Defendant Renaissance Learning, Inc. ("Renaissance") will and  
5 hereby does move the Court, pursuant to Federal Rule of Civil Procedure 12(b)(1)  
6 and 12(b)(6), to dismiss Plaintiffs' First Amended Complaint without leave to amend.  
7 For the reasons set forth in the accompanying Memorandum of Points and  
8 Authorities, Plaintiffs fail to state any claim upon which relief can be granted,  
9 requiring dismissal in full of their First Amended Complaint.

10 This motion is based upon this Notice, the accompanying Memorandum of  
11 Points and Authorities, the concurrently filed declaration of Bethany Lobo, the  
12 pleadings and papers on file in this action, and any further evidence or argument of  
13 counsel that the Court may receive at or before the hearing.

14

1 **MEMORANDUM OF POINTS AND AUTHORITIES**

2 **I. INTRODUCTION**

3 Plaintiffs' First Amended Complaint ("FAC") again presents a lengthy,  
4 jumbled "think piece" reflecting their policy views on how the educational  
5 technology ("edtech") sector *ought* to function. The FAC does not, however,  
6 adequately state any of its claims. This is unsurprising: this case belongs to a series  
7 of ideologically driven lawsuits Plaintiffs' counsel have brought against major U.S.  
8 edtech providers, seeking to destroy a longstanding regulatory framework allowing  
9 schools to consent to edtech providers' collection of student data for educational use.  
10 The Court should reject this attempt to legislate through the courts.

11 All of Plaintiffs' claims are legally deficient. As before, Plaintiffs'  
12 wiretapping claims fail because they do not allege that Renaissance "intercepted"  
13 data in transit or aided third-party interception of such data. Nor do they plead that  
14 the data at issue constitutes "confidential communications" under Section 632 of the  
15 California Invasion of Privacy Act ("CIPA"), particularly as it is well-established  
16 that students in schools have a *lesser* legal expectation of privacy than the public.  
17 Plaintiffs' newly added CIPA Section 638.51 pen register claim fares no better, as  
18 Plaintiffs have not alleged an Article III injury. The claim also fails as a matter of  
19 law because it cannot apply to Renaissance's purported collection of IP addresses.  
20 Plaintiffs also fail to plead statutory standing—and fail to state a claim—under the  
21 California Comprehensive Computer Data Access and Fraud Act ("CDAFA"),  
22 California Unfair Competition Law ("UCL"), and Wisconsin Deceptive Trade  
23 Practices Act ("WDTPA"). Finally, Plaintiffs' new common-law claims under  
24 Wisconsin law fail. Plaintiffs cannot state an intrusion upon seclusion claim because  
25 they do not (and cannot) allege that Renaissance physically intruded into a "place."  
26 Their unjust enrichment claim fails because they do not adequately allege that  
27 Renaissance received a cognizable benefit from Plaintiffs. Nor can their novel  
28 negligence claim stand: their alleged harm (*i.e.*, Renaissance's alleged unlawful

1 collection and use of student data) was not “foreseeable” where Renaissance—like  
2 other edtech providers—has provided customary, valuable educational tools  
3 consistent with longstanding regulatory interpretations.

4 In sum, Plaintiffs’ FAC repackages the deficient and conclusory allegations  
5 from the original complaint, demonstrating that further amendment would be futile  
6 and warranting dismissal with prejudice.

## 7 **II. FACTUAL BACKGROUND**

### 8 **A. Renaissance Provides Valuable Tools to Aid Students’ Learning**

9 Renaissance contracts with schools and school districts to provide educational  
10 software and services. FAC ¶ 39. Schools and educators rely on Renaissance’s tools  
11 to provide classroom instruction, administer student assessments, and analyze student  
12 learning. *See id.* Because these tools enhance the learning process, their use has  
13 become commonplace in students’ lives. *See id.* ¶ 38 (“School districts access an  
14 average of nearly 3,000 EdTech tools during a school year. A single student accesses  
15 nearly fifty EdTech tools per year.”).

16 Federal and state student data privacy laws recognize that schools need support  
17 from third-party service providers, including edtech companies, and thus contain  
18 exceptions to generally applicable consent requirements. Regulations implementing  
19 the federal Family Educational Rights and Privacy Act (“FERPA”) and a similar  
20 California statute authorize schools to share student data with service providers for  
21 legitimate educational purposes—as determined by the school—without express  
22 parental consent. *See* 34 C.F.R. § 99.31(a)(1)(i)(A); Cal. Educ. Code § 49076(a).  
23 Both federal and California law also authorize service providers to disclose student  
24 data to third parties. *See, e.g.,* 34 C.F.R. § 99.33(b)(1) (“the party receiving the  
25 information may make further disclosures of the information” where doing so would,  
26 *inter alia*, further legitimate educational interests); Cal. Bus. & Prof. Code  
27 § 22584(b)(4) (allowing operator to “further disclose” information to, e.g., “allow or  
28

1 improve operability and functionality”).<sup>1</sup>

2 Renaissance’s services comply with this well-established regulatory regime,  
3 which enables schools to utilize edtech vendors to enhance students’ learning  
4 experience.

5 **B. Plaintiffs Allege Their Children Use Four Renaissance Products**

6 Plaintiffs Nicole Reisberg and Amy Warren bring this action on behalf of their  
7 minor children: (1) Reisberg’s children, M.C. 1 and M.C. 2, who attended school in  
8 Orange County, California; and (2) Warren’s children, M.C. 3 and M.C. 4, who  
9 attended school in Kansas. FAC ¶¶ 25–30. Plaintiffs allege that, collectively, their  
10 children used four of Renaissance’s edtech products (the “Products”): (1) DnA, “a  
11 student-assessment and data-analytics platform” (*id.* ¶¶ 4, 77–80); (2) Fastbridge, an  
12 “assessment tool for monitoring and screening student progress” (*id.* ¶¶ 4, 61–65);  
13 (3) Nearpod, “an interactive instructional platform” (*id.* ¶¶ 4, 50–55); and (4)  
14 SAEBRS, a “screening tool used to [] identify students who may be at risk[.]” (*id.*  
15 ¶¶ 4, 68–74.)

16 Plaintiffs allege that the Products collect various student data. For example,  
17 they allege that DnA collected M.C. 1’s and M.C. 2’s names, student and school IDs,  
18 grade levels, attendance records, lunch balances, and guardian information. *Id.* ¶ 81.  
19 They allege that Nearpod collected M.C. 3’s and M.C. 4’s schoolwork, such as  
20 answers to multiple-choice questions. *Id.* ¶¶ 50–58. Fastbridge allegedly transmitted  
21

---

22 <sup>1</sup> For more than two decades, the Federal Trade Commission (“FTC”) has published  
23 guidance confirming that schools can consent on behalf of parents to the collection  
24 of personal information for educational purposes. *See* Children’s Online Privacy  
25 Protection Rule, 64 Fed. Reg. 59888, 59903 (Nov. 3, 1999) (online operators can rely  
26 on school authorization); *Complying with COPPA: Frequently Asked Questions*, n.  
27 N, FTC, [https://www.ftc.gov/business-guidance/resources/complying-coppa-](https://www.ftc.gov/business-guidance/resources/complying-coppa-frequently-asked-questions#N.%20COPPA%20AND%20SCHOOLS)  
28 [frequently-asked-questions#N.%20COPPA%20AND%20SCHOOLS](https://www.ftc.gov/business-guidance/resources/complying-coppa-frequently-asked-questions#N.%20COPPA%20AND%20SCHOOLS) (last visited  
October 28, 2025) (“schools may act as the parent’s agent and can consent under [the  
Children’s Online Privacy Protection Act (‘COPPA’)] to the collection of kids’  
information on the parent’s behalf”).

1 information about M.C. 3's and M.C. 4's academic assessments to Renaissance. *See*  
2 *id.* ¶¶ 61–65. And M.C. 3 and M.C. 4 allegedly completed surveys ranking and  
3 describing their social and emotional well-being through SAEBRS. *Id.* ¶¶ 68–74.

4 In sum, Plaintiffs allege that Renaissance unlawfully collected, used, and  
5 shared their children's data via the Products, for commercial purposes and without  
6 directly obtaining their consent. *Id.* ¶¶ 5–10, 18–21.

### 7 **III. LEGAL STANDARD**

#### 8 **A. Rule 12(b)(1)**

9 Federal Rule of Civil Procedure 12(b)(1) allows a defendant to move to  
10 dismiss a claim for lack of subject matter jurisdiction, including for lack of Article  
11 III standing. *Naruto v. Slater*, 888 F.3d 418, 425 n.7 (9th Cir. 2018). To bear their  
12 burden to establish Article III standing, plaintiffs must show “(1) a concrete and  
13 particularized injury, that (2) is fairly traceable to the challenged conduct, and (3) is  
14 likely to be redressed by a favorable decision.” *Va. House of Delegates v. Bethune-*  
15 *Hill*, 587 U.S. 658, 662 (2019).

#### 16 **B. Rule 12(b)(6)**

17 To survive a Rule 12(b)(6) motion to dismiss, plaintiffs must allege “enough  
18 facts” to state a facially plausible claim to relief. *Bell Atl. Corp. v. Twombly*, 550  
19 U.S. 544, 570 (2007). Factual allegations must create “more than a sheer possibility  
20 that a defendant has acted unlawfully.” *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009).  
21 Fraud-related factual allegations must satisfy Rule 9(b)'s heightened pleading  
22 requirements. *Kearns v. Ford Motor Co.*, 567 F.3d 1120, 1124 (9th Cir. 2009).  
23 Plaintiffs must allege the “time, place, and specific content of the false  
24 representations” and “the parties to the misrepresentations.” *Swartz v. KPMG LLP*,  
25 476 F.3d 756, 764 (9th Cir. 2007) (citation omitted).

26 The court need not allow plaintiffs to amend where “any amendment would be  
27 an exercise in futility.” *Steckman v. Hart Brewing, Inc.*, 143 F.3d 1293, 1298 (9th  
28 Cir. 1998).

1 **IV. ARGUMENT**

2 **A. Plaintiffs’ Federal and State Wiretapping Claims Fail Because They**  
3 **Have Not Alleged an “In Transit” Interception of “Content,” Third-**  
4 **Party Involvement, or Recording of “Confidential”**  
5 **Communications (Counts I, II, and IX).**

6 The federal Electronic Communications Privacy Act (“ECPA”), CIPA, and the  
7 Wisconsin Electronic Surveillance Control Law (“WESCL”) prohibit the  
8 unauthorized interception of communications, and courts frequently analyze alleged  
9 violations of these statutes jointly. *See Brodsky v. Apple Inc.*, 445 F. Supp. 3d 110,  
10 127 (N.D. Cal. 2020) (CIPA analysis “is the same as that under [ECPA]” (citation  
11 omitted)); *State v. Duchow*, 749 N.W.2d 913, 919 (Wis. 2008) (WESCL was  
12 intended to “effect the state ‘implementation’ of [ECPA]” and Wisconsin courts  
13 “employ[] reasoning from federal [wiretapping] decisions” when “interpreting the  
14 [WESCL]”) (citation omitted)).

15 Plaintiffs baldly allege that Renaissance unlawfully intercepted the contents of  
16 their communications. *See* FAC ¶¶ 370, 375–376, 387, 490. But Plaintiffs fail to  
17 articulate a cognizable theory of “interception.” On one hand, Plaintiffs allege that  
18 Renaissance is intercepting its own communications with them. *Id.* ¶ 178 (“These  
19 interactions are students’ communications with Renaissance . . . . [and] these  
20 communications are intercepted by [Renaissance’s product] Nearpod . . .  
21 simultaneously and in real-time when the student takes each of those actions on the  
22 product”). This theory fails because a recipient of a communication cannot legally  
23 intercept it. *See, e.g., In re Facebook, Inc. Internet Tracking Litig.*, 956 F.3d 589,  
24 607 (9th Cir. 2020) (ECPA and CIPA exempt parties to communications from  
25 liability); *Desnick v. Am. Broadcasting Companies, Inc.*, 44 F.3d 1345, 1353 (7th  
26 Cir. 1995) (“The federal and [Wisconsin] wiretapping statutes . . . allow one party to  
27 a conversation to record the conversation” unless the interception is done for a  
28 criminal or tortious purpose). On the other hand, Plaintiffs suggest that Renaissance  
intercepted their children’s activities on *third-party* websites. *See* FAC ¶ 371

1 (“communications intercepted by Renaissance included ‘contents’ of electronic  
2 communications made from Plaintiffs . . . to websites and other web properties *other*  
3 *than* Renaissance’s”). But these allegations are speculative. Plaintiffs do not  
4 identify the alleged third-party websites or “web properties,” let alone how  
5 Renaissance deployed its technology on these sites to intercept Plaintiffs’  
6 communications. In short, the Court should dismiss the wiretapping claims, whether  
7 they are based on allegations that Renaissance intercepted its own communications  
8 with Plaintiffs or eavesdropped on Plaintiffs’ communications with unidentified third  
9 parties.

10 Plaintiffs’ interception claims fail for additional reasons.

11 No “in transit” interception. For a communication to be “intercepted,” it “must  
12 be acquired during transmission, not while it is in electronic storage.” *Konop v.*  
13 *Hawaiian Airlines, Inc.*, 302 F.3d 868, 878 (9th Cir. 2002). Courts routinely dismiss  
14 wiretapping claims where plaintiffs fail to allege facts showing that their  
15 communications were wiretapped in real time. *See Valenzuela v. Keurig Green*  
16 *Mountain, Inc.*, 674 F. Supp. 3d 751, 758 (N.D. Cal. 2023) (dismissing wiretapping  
17 claim alleging defendant’s code “secretly intercept[ed] [communications] in real  
18 time” as “[t]hat statement does little more than restate the pleading requirement of  
19 real time interception”); *Heiting v. Taro Pharms. USA, Inc.*, 709 F. Supp. 3d 1007,  
20 1019 (C.D. Cal. 2023) (similar).

21 Here, Plaintiffs attempt to satisfy this pleading requirement by making  
22 unsupported assertions that Renaissance’s platforms *can* collect user information in  
23 “real time” without alleging facts showing that these interceptions took place (1) as  
24 described or (2) as to Plaintiffs’ children, specifically. *See* FAC ¶¶ 147, 152, 156,  
25 158, 162–64, 171, 178, 181, 187, 191, 196, 198, 202–04, 212, 220. Another court in  
26 this District dismissed near-identical wiretapping claims on this basis. *See*  
27 *Hernandez-Silva v. Instructure, Inc.*, No. 2:25-cv-02711-SB-MAA, 2025 WL  
28 2233210, at \*5 (C.D. Cal. Aug. 4, 2025) (dismissing CIPA claims where the

1 complaint “only vaguely references [d]efendant’s use of [Application Program  
2 Interfaces or APIs] without explaining how the technology allows real-time  
3 interception in general or how it was used to intercept [p]laintiffs’ data in  
4 particular”).<sup>2</sup> This Court should likewise dismiss Plaintiffs’ wiretapping claims.

5 No third-party involvement. Plaintiffs’ CIPA Section 631 claim fails for  
6 additional reasons. They allege that Renaissance “aided and assisted numerous third  
7 parties . . . to unlawfully intercept protected communications[.]” FAC ¶ 391. This  
8 apparently attempts to allege a violation of clause four of CIPA Section 631(a), which  
9 imposes liability on someone “who aids, agrees with, employs, or conspires with any  
10 person or persons to” advance an act of eavesdropping or wiretapping.

11 Courts reject CIPA claims premised on third-party involvement where, as here,  
12 the third parties are service providers who passively store the data for a client’s later  
13 retrieval or analysis (rather than independently using the data). *See Graham v. Noom,*  
14 *Inc.*, 533 F. Supp. 3d 823, 832 (N.D. Cal. 2021) (dismissing CIPA claim because  
15 service provider was not an eavesdropper, as it merely “provide[d] a software service  
16 that capture[d] its clients’ data, host[ed] it on [provider]’s servers, and allow[ed] the  
17 clients to analyze their data”). Of the 17 third-party “vendors” Plaintiffs identify,  
18 FAC ¶ 136, they concede that many only provide passive technical functions such as  
19 “engineering support.” To the extent they allege that any vendors assist with more  
20 “involved” functions such as “product development,” Plaintiffs do not allege any  
21 facts showing that Renaissance provides these vendors student PII for these  
22 functions.<sup>3</sup> *See* FAC ¶ 132 (conclusory allegations that Renaissance “discloses  
23 personal information” to vendors). Plaintiffs do not plausibly allege that any vendors  
24 participated in any direct, simultaneous recording of communications on  
25

26 <sup>2</sup> The *Instructure* plaintiffs did not assert ECPA or WESCL claims.

27 <sup>3</sup> Plaintiffs purport to cite to a Renaissance “product privacy policy,” FAC ¶ 137 n.  
28 19, to establish their allegations regarding third-party disclosures, but the link  
referenced in that footnote does not contain the disclosures that they claim.

1 Renaissance’s platform.<sup>4</sup> *Cf. Q.J. v. PowerSchool Holdings LLC*, No. 23-5689, 2025  
2 WL 2410472, at \*1, 8 (N.D. Ill. Aug. 20, 2025) (denying dismissal of CIPA claim  
3 based on particularized allegations that a third-party provider “automatically  
4 capture[d] [] user interactions on [defendant’s platform], from the moment of  
5 installation forward, including every click, swipe, tap, pageview, and fill” (internal  
6 quotations and citations omitted)). Plaintiffs do not allege facts—outside of their  
7 self-serving “description[s]” (*see* FAC ¶ 136)—that any of these vendors  
8 independently used Renaissance data, as would be required for an aiding and abetting  
9 claim. *See Graham*, 533 F. Supp. 3d at 832.

10 No “confidential communications.” Section 632 applies only to “confidential  
11 communications,” where one party “has an objectively reasonable expectation that  
12 the conversation is not being overheard or recorded.” *Flanagan v. Flanagan*, 27 Cal.  
13 4th 766, 768 (2002). “[I]n California, courts have developed a presumption that  
14 Internet communications do not reasonably give rise to that expectation.” *Revitch v.*  
15 *New Moosejaw, LLC*, No. 18-CV-06827-VC, 2019 WL 5485330, at \*3 (N.D. Cal.  
16 Oct. 23, 2019); *see also Boulton v. Community.com, Inc.*, No. 23-3145, 2025 WL  
17 314813, at \*2 (9th Cir. Jan. 28, 2025) (Section 632 does not apply to any text-based  
18 communications because they “are by nature recorded”).

19 Plaintiffs’ Section 632 claim is predicated on Renaissance’s “non-consensual  
20 tracking of the Plaintiffs’ and Class members’ *internet communications*[.]” FAC  
21 ¶ 387 (emphasis added). This is insufficient. Further, as discussed *supra*, Plaintiffs  
22 affirmatively allege that Renaissance publicly discloses as part of its privacy notice<sup>5</sup>  
23

24  
25 <sup>4</sup> This includes Mixpanel, for whom Plaintiffs again offer only cursory, unsupported  
26 allegations of real-time interception. *See* FAC ¶¶ 171–181.

27 <sup>5</sup> The privacy notice is incorporated by reference into the FAC, which repeatedly  
28 quotes it, and may be considered by the court in resolving this motion. *See* FAC  
¶¶ 86, 99, 233, 250; 8 *Lane Inv., Inc v. GenTech Sci., Inc.*, No.  
822CV01686FWSKES, 2022 WL 20182971, at \*2 n. 1 (C.D. Cal. Mar. 16, 2022)

1 that “dozens” of vendors may have access to personal information. *Id.* ¶¶ 136–137.  
2 Given Renaissance’s public disclosure of the scope of potential data sharing, they  
3 had no “objectively reasonable expectation” that student communications would not  
4 be “overheard or recorded.” *See Hubbard v. Google LLC*, No. 19-CV-07016-SVK,  
5 2024 WL 3302066, at \*7 n.9 (N.D. Cal. July 1, 2024) (“reasonable users should  
6 expect the collection of their internet-browsing data” particularly where complaint  
7 admitted awareness of “commonplace collection . . . of such data”). Indeed,  
8 Plaintiffs’ awareness of Renaissance’s data collection practices is illustrated by the  
9 FAC’s allegations, which are based on publicly available sources. *See* FAC ¶¶ 108–  
10 151.

11 Finally, Plaintiffs’ allegation that their children had “objectively reasonable  
12 expectations of privacy in their devices and activity,” FAC ¶ 390, disregards long-  
13 established precedent that “students at school have a lesser expectation of privacy  
14 than members of the public generally.” *Bravo ex rel. Ramirez v. Hsu*, 404 F. Supp.  
15 2d 1195, 1201 (C.D. Cal. 2005) (citing *Vernonia Sch. Dist. 47J v. Acton*, 515 U.S.  
16 646, 656-57 (1995)). The “devices” that students used to access Renaissance’s  
17 educational services were also school property, further illustrating that students had  
18 no objectively reasonable expectation of privacy, particularly vis-à-vis the edtech  
19 provider and its vendors. FAC ¶¶ 25–29.

20 **B. Plaintiffs’ CIPA Pen Register Claim Fails for Multiple,**  
21 **Independent Reasons (Count III).**

22 Plaintiffs allege a CIPA pen register claim in the alternative to their CIPA  
23 wiretapping claim. CIPA prohibits installing a pen register device without a court  
24 order. Cal. Penal Code § 638.51(a). A “pen register” is “a device or process that  
25 records or decodes dialing, routing, addressing, or signaling information transmitted  
26 by an instrument or facility from which a wire or electronic communication is

27 \_\_\_\_\_  
28 (Slaughter, J.) (on a motion to dismiss, considering undisputedly authentic  
documents which were hyperlinked in the complaint).

1 transmitted, but not the contents of a communication.” Cal. Penal Code § 638.50(b).

2 Plaintiffs theorize that Renaissance’s products are pen register devices because  
3 they collect users’ IP address.<sup>6</sup> This strains CIPA’s plain text, which says nothing  
4 about IP addresses. Fundamentally, this is inconsistent with how the Internet works:  
5 all website operators receive visitors’ IP addresses when loading the pages requested  
6 by those visitors.<sup>7</sup> This requires dismissal of Plaintiffs’ pen register claim for two  
7 reasons.

8 **First**, Plaintiffs lack Article III standing to bring their CIPA pen register claim  
9 because they have suffered no injury in fact. *See Lujan v. Defs. of Wildlife*, 504 U.S.  
10 555, 560 (1992) (plaintiffs must “have suffered an ‘injury in fact’—an invasion of a  
11 legally protected interest which is (a) concrete and particularized, and (b) ‘actual or  
12 imminent, not ‘conjectural’ or hypothetical[.]’”) (citations omitted). Courts have  
13 repeatedly held that “there is no legally protected privacy interest in IP addresses.”  
14 *Heeger v. Facebook, Inc.*, 509 F. Supp. 3d 1182, 1189 (N.D. Cal. 2020) (dismissing  
15 CIPA claim for lack of Article III standing); *see also, e.g., Khamooshi v. Politico*  
16 *LLC*, 786 F. Supp. 3d 1174, 1179–80 (N.D. Cal. 2025) (similar; collecting cases).  
17 Since Plaintiffs’ pen register claim is based on the alleged collection of their IP  
18 addresses, in which they have no privacy interest, they have suffered no injury and  
19

---

20 <sup>6</sup> Plaintiffs briefly reference “Device Metadata,” which they contend also comprises  
21 “routing, addressing, or signaling information” collected by Renaissance’s products.  
22 *See* FAC ¶ 399. However, they never explain the process through which this data is  
23 purportedly collected—nor do they clarify whether the process is the same for all  
24 Renaissance products. Indeed, the phrase “Device Metadata” is only ever referenced  
in conclusory allegations relating to Plaintiffs’ pen register claim and occurs nowhere  
else in the FAC. *See id.* at ¶¶ 399, 401–03.

25 <sup>7</sup> *See, e.g., What is an IP address?*, NORTON (last updated Apr. 15, 2025),  
26 <https://us.norton.com/blog/privacy/what-is-an-ip-address> (“Google and other web  
27 services know your IP address because it’s assigned to your device and is required to  
28 connect to the internet in the first place.”). This fact is judicially noticeable under  
Federal Rule of Evidence 201 as a fact generally known within this Court’s  
jurisdiction.

1 lack standing.

2 The Ninth Circuit’s recent opinion in *Popa v. Microsoft Corporation* illustrates  
3 as much. 153 F.4th 784 (9th Cir. 2025). There, the plaintiff alleged that Microsoft’s  
4 session replay software—which monitored users’ keystrokes while interacting with  
5 websites—violated state wiretapping and privacy tort law. The court held that the  
6 plaintiff did not “explain how the tracking of her interactions with the [ ] website  
7 caused her to experience any kind of harm that is remotely similar to the ‘highly  
8 offensive’ [privacy] interferences or disclosures that were actionable at common  
9 law[,]” and which could confer Article III standing. *Id.* at \*5. This binding precedent  
10 applies: Plaintiffs do not (and cannot) allege a “highly offensive” privacy invasion  
11 that would have been actionable at common law based on the disclosure of their IP  
12 addresses to Renaissance. Thus, they have not adequately pled Article III standing.  
13 This Court lacks jurisdiction and should dismiss Plaintiffs’ pen register claim on this  
14 basis alone.

15 **Second**, even if this Court had jurisdiction, it would fail because CIPA’s pen  
16 register prohibition does not apply to IP address information. CIPA’s pen register  
17 prohibition is a criminal statute. Cal. Penal Code § 638.51. As such, it should be  
18 applied “as favorably to the defendant as the language of the statute and the  
19 circumstances of its application may reasonably permit.” *Walsh v. Dep’t of Alcoholic*  
20 *Beverage Control*, 59 Cal. 2d 757, 764–65 (1963); *see also Jane Doe v. Eating*  
21 *Recovery Ctr., LLC*, No. 23-cv-05561-VC, 2025 WL 2971090, at \*1 (N.D. Cal. Oct.  
22 17, 2025) (urging courts to “resolve CIPA’s many ambiguities” in favor of “narrower  
23 but equally reasonable interpretation[s]” which do not extend liability to new  
24 technologies not mentioned by the statute). This principle applies “even when,” as  
25 here, “the underlying action is civil in nature.” *Walsh*, 59 Cal. 2d at 765.

26 A court’s “fundamental task in construing a statute is to ascertain the intent of  
27 the lawmakers so as to effectuate the purpose of the statute.” *Day v. City of Fontana*,  
28 25 Cal. 4th 268, 272 (2001). Here, the intent of California lawmakers—as

1 demonstrated by CIPA’s statutory language and legislative history—shows the pen  
2 register prohibition does not apply to collection of IP addresses.

3 CIPA’s legislative history shows that the Legislature was focused on  
4 “authoriz[ing] state and local law enforcement to seek emergency orders for pen  
5 registers/trap and trace devices used in telephone surveillance.” Cal. Assem. Comm.  
6 on Privacy & Consumer Prot., Analysis of A.B. 929, 2015-2016 Leg., Reg. Sess.  
7 (Apr. 21, 2015). The Legislature has since updated CIPA multiple times “in response  
8 to the emergence of new communication devices,” *Smith v. LoanMe, Inc.*, 11 Cal.  
9 5th 183, 191 (2021), but has never included IP address information.

10 Thus, neither the statutory definition of “pen register” nor the legislative  
11 history shows that the Legislature intended for CIPA’s pen register provision to  
12 govern *every* instance of IP address collection. These collections occur innumerable  
13 times each second, every time a person visits a website as an inherent part of the  
14 process. *See Capitol Records Inc. v. Thomas-Rasset*, No. 06-1497 (MJD/RLE), 2009  
15 WL 1664468, at \*3 (D. Minn. June 11, 2009) (“standard computer operations require  
16 recording IP addresses so parties can communicate with one another over the  
17 Internet.”). This is unsurprising. Interpreting the pen register prohibition to apply to  
18 the collection of IP address information would require website operators to collect  
19 consent before loading webpages, needlessly complicating web browsing.

20 As courts in California have recognized, nothing in the statute shows that the  
21 Legislature intended such a result. *See, e.g., Licea v. Hickory Farms, LLC*, No.  
22 23STCV26148, 2024 WL 1698147, at \*4 (Cal. Super. Ct. L.A. Cnty. Mar. 13, 2024)  
23 (sustaining demurrer because “public policy strongly disputes” the notion that “every  
24 single [website] voluntarily visited by a potential plaintiff” has “violat[ed]” CIPA’s  
25 pen register prohibition by collecting plaintiff’s “IP address for purposes of  
26 connecting the website”); *see also* Order at 4, *Levings v. Open Text Corp.*, No.  
27 24STCV05440 (Cal. Super. Ct. L.A. Cnty. Sept. 3, 2024) (“[T]he [operative  
28 complaint] is merely describing what happens every time a user accesses any

1 website.”); Order at 3, *Rodriguez v. Plivo Inc.*, No. 24STCV08972 (Cal. Super. Ct.  
2 L.A. Cnty. Oct. 2, 2024) (similar); Order at 3, *Scharon v. Paramount Global*, No.  
3 25STCV10585 (Cal. Super. Ct. L.A. Cnty. Oct. 3, 2025) (similar); Order at 5,  
4 *Sanchez v. Letter Four*, No. 24STCV18924 (Cal. Super. Ct. L.A. Cnty. Apr. 17,  
5 2025) (similar). Courts examining the Federal Pen Register Act—upon which the  
6 California pen register statute was modeled—have reached similar conclusions. *See*,  
7 *e.g.*, *Capital Records Inc.*, 2009 WL 1664468, at \*3 (finding that an “IP address is  
8 transmitted as part of the normal process of connecting one computer to another over  
9 the Internet” and consequently, “the Pen Register Act cannot be intended to prevent  
10 individuals who receive electronic communications from recording the IP  
11 information sent to them. If it did apply in those cases, then the Internet could not  
12 function[.]”); *see also Malibu Media LLC v. Pontello*, No. 13-12197, 2013 WL  
13 12180709, at \*3–4 (E.D. Mich. Nov. 19, 2013) (the Pen Register Act does not prevent  
14 a third party from accessing a user’s IP address because, by using the website, the  
15 user consensually engaged and “communicated his IP address”).

16 Further, Plaintiffs’ interpretation of the pen register statute is in tension with  
17 California’s Consumer Privacy Act (“CCPA”), Cal. Civ. Code §§ 1798.100 *et seq.*  
18 The CCPA created a balanced regulatory framework for data collection, processing,  
19 and sharing which reflects the California Legislature’s current perspective on online  
20 privacy—unlike CIPA, which was enacted in 1967, well before the advent of the  
21 internet. *See Doe*, 2025 WL 2971090, at \*3, \*6 (expressing doubt that the California  
22 Legislature would have ever intended CIPA to encompass certain routine web  
23 browsing experiences where (i) “CIPA was enacted in 1967[.]” (ii) [i]ts language  
24 . . . is ill-suited for application to internet communications[.]” and (iii) “California  
25 has since adopted other statutes that more clearly speak to the practice of data  
26 sharing,” like the CCPA). The CCPA framework also *permits* what Plaintiffs seek  
27 to prohibit. That is, the CCPA permits website operators to collect users’ personal  
28 data, subject to procedural formalities, when that data is “reasonably necessary and

1 proportionate to achieve the purposes for which the personal information was  
2 collected or processed[.]” *Id.* § 1798.100(c). Collecting an IP address—a step that  
3 is necessary every time a webpage loads—is plainly “reasonably necessary.” *See id*;  
4 *see also Capitol Records Inc.*, 2009 WL 1664468, at \*3.

5 Plaintiffs’ misinterpretation of CIPA’s pen register provision would be  
6 untenable, as a California court explained this month: “If CIPA and the limitations  
7 on pen registers and trap and trace devices categorically prohibit collection of [IP  
8 address information] from website visitors, then the CCPA’s provisions permitting  
9 reasonable collection of such data are a nullity. That would be an improper way to  
10 interpret and harmonize California law.” *See* Order at 2–3, *Scharon v. Paramount*  
11 *Global*, No. 25STCV10585 (Cal. Super. Ct. L.A. Cnty. Oct. 3, 2025); *see generally*  
12 *Nat’l Indem. Co. v. Garamendi*, 233 Cal. App. 3d 392, 405 (1991) (“[C]ourts must  
13 construe a statute so as not to conflict with the other legislative enactments.”).

14 Accordingly, Plaintiffs’ CIPA pen register claim fails and should be dismissed  
15 without leave to amend.

16 **C. Plaintiffs Lack CDAFA Standing and Fail to Plead a CDAFA**  
17 **Violation (Count IV).**

18 Plaintiffs’ CDAFA claim repeats the same deficient allegations as before and  
19 fails for the same reasons.

20 CDAFA is an “anti-hacking statute” designed to “prohibit the unauthorized  
21 use of any computer system for improper or illegitimate purpose[s].” *Custom*  
22 *Package Supply, Inc. v. Phillips*, No.15:cv-04584-ODW-AGR, 2015 WL 8334793,  
23 at \*3 (C.D. Cal. Dec. 7, 2015); Cal. Penal Code § 502(a) (statute meant to combat  
24 the “proliferation of computer crime[s]”). CDAFA exists to address data breaches,  
25 hacking, and other unauthorized access—a fundamental mismatch with Plaintiffs’  
26 theory. Unsurprisingly, then, Plaintiffs both lack statutory standing and have not  
27 otherwise stated this claim.

28 CDAFA standing requires a showing of “damage or loss.” Cal. Penal Code

1 § 502(e)(1). The “damage or loss” requires “some damage to the computer system,  
2 network, program, or data contained on that computer.” *Heiting*, 709 F. Supp. at  
3 1020–21; *Instructure*, 2025 WL 2233210, at \*6. Plaintiffs only allege that  
4 Renaissance “was unjustly enriched by acquiring the valuable personal information  
5 of [Plaintiffs] . . . without permission and using it for Renaissance’s own financial  
6 benefit to advance its business interests.” FAC ¶ 412. This does not confer CDAFA  
7 standing.

8 To start, this allegation is conclusory: there are no factual allegations that  
9 Renaissance profited from, for example, selling the contested data to data brokers or  
10 using it to advertise. This theory of “damage or loss” is also fundamentally a privacy  
11 violation theory, which does not confer CDAFA standing. *See, e.g., Doe v. Cnty. of*  
12 *Santa Clara*, No. 23-cv-04411-WHO, 2024 WL 3346257, at \*9–10 (N.D. Cal. July  
13 8, 2024) (no CDAFA standing where plaintiff alleged that “Defendants took  
14 something of value from Plaintiff . . . and derived benefit therefrom without  
15 Plaintiff’s . . . knowledge or informed consent and without sharing the benefit”);  
16 *Heiting*, 709 F. Supp. 3d at 1020–21 (collecting cases holding that privacy violations  
17 based on loss of data “do not qualify [as ‘damage or loss’] under the statute”); *Doe*  
18 *v. Tenet Healthcare Corp.*, 789 F. Supp. 3d 814, 845 (E.D. Cal. June 9, 2025) (finding  
19 no CDAFA standing where Plaintiffs alleged that “their medication information has  
20 economic value and that Defendants unjustly profited from” obtaining it).

21 Beyond standing deficiencies, Plaintiffs again fail to plausibly plead a CDAFA  
22 claim. They allege that Renaissance violated CDAFA section 502(c)(2) by  
23 “knowingly accessing and without permission taking, copying, analyzing, and using  
24 Plaintiffs’ and Class members’ data.” *Id.* ¶ 410. This does not suffice.

25 **First**, Plaintiffs’ allegation that Renaissance acted “knowingly” “without  
26 permission” is contradicted by their admission that Renaissance “relie[d] on the  
27 consent of school personnel” to process students’ data. *See id.* ¶ 14; *cf. United States*  
28 *v. Olson*, 856 F.3d 1216, 1220 (9th Cir. 2017) (“[Courts] ordinarily read a phrase in

1 a criminal statute that introduces the elements of a crime with the word ‘knowingly’  
2 as applying that word to each element” (citation omitted)). Thus, Plaintiffs do not,  
3 and cannot, plead that Renaissance *knew* it lacked permission to receive and process  
4 students’ data.

5 **Second**, CDAFA defines “[a]ccess” to mean “to gain entry to, instruct, cause  
6 input to, cause output from, cause data processing with, or communicate with, the  
7 logical, arithmetical, or memory function resources of a computer, computer system,  
8 or computer network.” Cal. Penal Code § 502(b)(1). “While [CDAFA] has been  
9 extended by some district courts outside of the traditional hacking realm,” courts still  
10 require a showing that “defendant in some way caused output from the function of a  
11 computer, without the owner’s permission.” *Heiting*, 709 F. Supp. 3d at 1020.  
12 Plaintiffs do not allege that Renaissance collected data from or accessed parts of their  
13 children’s computers *outside* of Renaissance’s products. *See id.* (dismissing CDAFA  
14 claim where defendant’s alleged collection of data did not satisfy “access” element  
15 because plaintiff did not allege “that [d]efendant implanted anything on her  
16 computer” or otherwise “make clear how any ‘access’ took place”).

17 Thus, Plaintiffs’ CDAFA claim should be dismissed.

18 **D. Plaintiffs’ UCL Claim Fails Because They Lack Standing and Do**  
19 **Not Plausibly Plead Any of the Prongs (Count V).**

20 Plaintiffs’ UCL claim similarly fails for both lack of statutory standing and  
21 failure to allege the requisite elements.

22 No statutory standing. To have UCL standing, plaintiffs must plead that they  
23 “lost money or property as a result of the unfair competition.” *Birdsong v. Apple,*  
24 *Inc.*, 590 F.3d 955, 959 (9th Cir. 2009). Plaintiffs allege that they suffered loss based  
25 on Renaissance’s alleged “unauthorized disclosure and taking of [their children’s]  
26 personal information” and the resulting “diminution of the value of their private and  
27 personally identifiable data and content.” FAC ¶ 428. Neither theory is viable.

28 As to Plaintiffs’ “unauthorized taking” theory, “[n]umerous courts have held

1 that disclosure of personal information alone does not constitute economic or  
2 property loss sufficient to establish UCL standing[.]” *Mastel v. Miniclip SA*, 549 F.  
3 Supp. 3d 1129, 1144 (E.D. Cal. 2021); *see Katz-Lacabe v. Oracle Am., Inc.*, 668 F.  
4 Supp. 3d 928, 943 (N.D. Cal. 2023) (“[t]he weight of the authority . . . [holds] that  
5 the mere misappropriation of personal information does not establish compensable  
6 damages” under the UCL (citation modified)); *Cappello v. Walmart Inc.*, No. 18-cv-  
7 06678-RS, 2019 WL 11687705, at \*4 (N.D. Cal. Apr. 5, 2019) (“[p]laintiffs must  
8 allege more than a loss of personal information to establish standing under the  
9 UCL.”).

10 Plaintiffs’ “diminution of value” theory fares no better because they fail to  
11 plausibly “allege they ever attempted or intended to participate in [the] market [for  
12 their PII], or otherwise to derive economic value from their PII.” *Moore v.*  
13 *Centrelake Med. Grp., Inc.*, 83 Cal. App. 5th 515, 538–39 (2022). Courts have  
14 dismissed UCL claims in edtech data privacy matters predicated on the “diminution  
15 of value” framework, because “there is no nonspeculative basis . . . for thinking  
16 plaintiffs can or would transact with the personal information at issue, such as their  
17 exam scores or behavioral assessments . . . [In fact,] [i]t is reasonable to infer that  
18 plaintiffs would choose *not* to transact in that market” given their alleged privacy  
19 interests in such data. *Cherkin v. PowerSchool Holdings, Inc.*, No. 24-cv-02706-JD,  
20 2025 WL 844378, at \*5 (N.D. Cal. Mar. 17, 2025); *see Instructure*, 2025 WL  
21 2233210, at \*6 (dismissing UCL claim in edtech case because “allegations about the  
22 loss of value of data” did not confer statutory standing).

23 To evade this threshold standing requirement, Plaintiffs add unsupported  
24 allegations that Renaissance “prevented the development of a legitimate market for  
25 student data” and that “Plaintiffs would consider participating in a market for their  
26 information” under hypothetical conditions. FAC ¶ 430. Given that Plaintiffs  
27 elsewhere plead that the information allegedly collected by Renaissance is “highly  
28 personal and sensitive,” *id.* ¶¶ 73, 441, this attempt to “self-engineer” statutory

1 standing is unavailing. In any event, Plaintiffs’ imagining a theoretical market in  
2 which they might participate is insufficient to confer UCL standing, which requires  
3 that Plaintiffs “attempt[] or intend[] to participate” in an **existing** market. *See Moore*,  
4 83 Cal. App. 5th at 538–39.

5 No claim under any UCL prong. Plaintiffs’ unlawful prong theory is premised  
6 “state and federal law” violations pled elsewhere in the FAC. FAC ¶ 427. Because  
7 Plaintiffs’ statutory claims are deficient, their derivative UCL claim also fails. *See*  
8 *Aleksick v. 7-Eleven, Inc.*, 205 Cal. App. 4th 1176, 1185 (2012) (“When a statutory  
9 claim fails, a derivative UCL claim also fails.”). Plaintiffs’ common law claims,  
10 meanwhile, cannot form the basis of an unlawful prong claim. *See Shroyer v. New*  
11 *Cingular Wireless Servs., Inc.*, 622 F.3d 1035, 1043–44 (9th Cir. 2010) (common  
12 law violations are insufficient for UCL unlawful prong claims).

13 Similarly, Plaintiffs’ unfair prong claim fails because it is based on the same  
14 alleged conduct as their meritless claims under the other prong(s). *See Hadley v.*  
15 *Kellogg Sales Co.*, 243 F. Supp. 3d 1074, 1104–05 (N.D. Cal. 2017) (where the unfair  
16 prong “overlap[s] entirely with . . . the fraudulent and unlawful prongs of the UCL,  
17 the unfair prong of the UCL cannot survive if the claims under the other two prongs  
18 of the UCL do not survive”).<sup>8</sup>

---

22 <sup>8</sup> The FAC does not explicitly invoke the UCL’s fraudulent prong. FAC ¶¶ 419–432.  
23 Even had Plaintiffs attempted to do so, their claim would fail because they do not  
24 plead that they were exposed to any of Renaissance’s alleged misrepresentations  
25 prior to their children using Renaissance’s products, let alone plead with Rule 9(b)  
26 particularity that they relied on those misrepresentations to their detriment. *See Figy*  
27 *v. Amy’s Kitchen, Inc.*, No. CV 13–03816 SI, 2013 WL 6169503, at \*4 (N.D. Cal.  
28 Nov. 25, 2013) (collecting cases); *see also Sateriale v. R.J. Reynolds Tobacco Co.*,  
697 F.3d 777, 793 (9th Cir. 2012) (“actual reliance on the allegedly deceptive or  
misleading statements,” along with causation, required to state a fraud-based UCL  
claim).

1           **E. Plaintiffs’ Intrusion Upon Seclusion Claim Fails as They Do Not**  
2           **Allege a Physical Intrusion or Demonstrate That They Provided**  
3           **Data to Renaissance Unwillingly (Count VI).**

4           In Wisconsin, the tort of intrusion upon seclusion penalizes an “[i]ntrusion  
5           upon the privacy of another of a nature highly offensive to a reasonable person . . .  
6           in a *place* that a reasonable person would consider private or in a manner that is  
7           actionable for trespass.” Wis. Stat. Ann. § 995.50(2)(am) (emphasis added).

8           Courts consistently hold that the word “place” in the statute is “geographical,”  
9           requiring an actual physical incursion—it does not cover alleged violations of an  
10          individual’s “private affairs or concerns[.]” *See Hillman v. Columbia Cnty.*, 474  
11          N.W.2d 913, 919 (Wis. Ct. App. 1991); *see also Buckeridge v. Univ. of WI Hosp. &*  
12          *Clinics Auth. UW Health*, 932 N.W.2d 185, 185 (Wis. Ct. App. 2019) (dismissing an  
13          intrusion claim predicated on defendant’s alleged wrongful disclosure of plaintiff’s  
14          health information to third parties because “records stored on . . .[a] computer system  
15          are [not] ‘geographical’”); *see also Doe v. Saftig*, No. 09-C-1176, 2011 WL 1792967,  
16          at \*14 (E.D. Wis. May 11, 2011) (dismissing an intrusion claim predicated on  
17          defendant’s alleged wrongful disclosure of plaintiff’s personal information to third  
18          parties, as it “does not involve an intrusion into a private ‘place’... or private  
19          ‘belongings’”).

20          Here, Plaintiffs’ intrusion claim is predicated solely on Renaissance’s alleged  
21          misuse and wrongful disclosure of personal information collected from students  
22          accessing Renaissance’s digital platforms. *See* FAC ¶¶ 435–36. Such conduct does  
23          not constitute a violation of any geographical or physical “space” and therefore  
24          cannot be the subject of an intrusion claim under Wisconsin law.<sup>9</sup>

25          <sup>9</sup> Even if an intrusion into an electronic device were actionable, Plaintiffs and their  
26          children had no cognizable privacy interest in the “school-issued” devices that their  
27          children allegedly used to access Renaissance platforms. FAC ¶¶ 25–29. *See In re*  
28          *Isiah B.*, 500 N.W.2d 637, 641 (Wis. 1993) (students have no reasonable expectation  
        of privacy over school property temporarily leased to them). The intrusion claim also  
        fails because the information at issue was provided “willingly.” FAC ¶¶ 50–51, 61–

1           **F. Plaintiffs’ Theory of Liability Fails to Establish Unjust Enrichment**  
2           **Under Wisconsin Law (Count VII)**<sup>10</sup>

3           Plaintiffs have not stated an unjust enrichment claim because students’  
4           “confer[ral]” of personal information to Renaissance does not constitute the required  
5           tangible benefit. *See* FAC ¶ 449. Indeed, the only decision Renaissance located  
6           applying Wisconsin law to the “question of whether the conferral of PII can itself  
7           constitute a benefit for purposes of unjust enrichment” held that it could not. *See*  
8           *Giasson v. MRA - Mgmt. Ass’n, Inc.*, 777 F. Supp. 3d 913, 940-41 (E.D. Wis. 2025)  
9           (noting caselaw trend of “reject[ing] unjust enrichment claims premised on this  
10           theory”; dismissing PII-related unjust enrichment claim where complaint “lack[ed]  
11           any contextualizing information as to what role Plaintiff’s PII played in Defendant’s  
12           business operation and how Defendant’s retention of her PII benefitted Defendant in  
13           some measurable, economic sense”).

14           The FAC does not allege that Renaissance received any other tangible benefit.  
15           It at most speculates that Renaissance obtained investors because it collects student  
16           data. *See* FAC ¶ 47. And Plaintiffs rely on vague assertions about the market for  
17           “user data,” *see id.* ¶ 307, but do not allege what value (if any) the alleged collection  
18           and use of student data offers to Renaissance’s business, let alone what value  
19           Plaintiffs’ children’s data specifically would have.

20           Further, “under Wisconsin’s law of unjust enrichment[,] it is not inequitable  
21           for one to benefit from the willful disclosure of information or an idea when such an  
22           idea . . . is not protected by some sort of intellectual property right.” *Fail Safe LLC*  
23           *v. A.O. Smith Corp.*, 762 F. Supp. 2d 1126, 1130 (E.D. Wis. 2011), *aff’d*, 674 F.3d  
24           889 (7th Cir. 2012); *see ConFold Pac., Inc. v. Polaris Indus., Inc.*, 433 F.3d 952, 957  
25           (7th Cir. 2006) (“Wisconsin law denies recovery for unjust enrichment if all the

26           \_\_\_\_\_  
27           62, 77–78; *Linman v. Marten Transp., Ltd.*, No. 22-CV-204-JDP, 2023 WL 2562712,  
28           at \*6 (W.D. Wis. Mar. 17, 2023).

<sup>10</sup> Plaintiffs bring Count VII “pursuant to Wisconsin Law.” FAC at p. 79.

1 defendant has done is use (to his profit) an idea of the plaintiff that is not a trade  
2 secret.”). Plaintiffs do not allege any intellectual property or trade secret rights in  
3 any information they knowingly inputted into a Renaissance platform. Thus, even  
4 were Plaintiffs correct that Renaissance uses this information solely for its own profit  
5 (they are not), they would not have stated an unjust enrichment claim.

6 Finally, “[u]njust enrichment involves getting something for nothing, not  
7 providing a product for a price.” *T&M Farms v. CNH Indus. Am., LLC*, 488 F. Supp.  
8 3d 756, 769 (E.D. Wis. 2020). Where a party “receive[s] something in return for the  
9 benefit they supposedly conferred” but finds the return service “did not meet  
10 expectations,” they are entitled to pursue legal remedies but cannot obtain equitable  
11 relief based on an unjust enrichment theory. *Id.* Here, Plaintiffs allege that  
12 Renaissance provided their children with access to its educational platforms and  
13 products in exchange for a wrongful conferral of users’ personal information. In  
14 short, Plaintiffs admittedly received a benefit from their use of Renaissance’s  
15 products (*see* FAC ¶¶ 50–51, 57, 61–62, 68–70, 77–78), requiring dismissal of their  
16 unjust enrichment claim.

17 **G. Plaintiffs Fail to Plead a Plausible Negligence Claim (Count VIII)**

18 Plaintiffs fail to state a negligence claim either under a classic or negligence  
19 *per se* theory of liability.

20 **First**, while Wisconsin “follows the minority view that everyone owes to the  
21 world at large the duty of refraining from those acts that may unreasonably threaten  
22 the safety of others,” plaintiffs must still allege a “foreseeable” breach of the  
23 defendant’s duty. *Mitchell v. Hess*, No. 08-C-847, 2010 WL 1212080, at \*3 (E.D.  
24 Wis. Mar. 23, 2010) (internal quotations and citations omitted). As discussed,  
25 Renaissance—like numerous other edtech companies—has long followed FTC  
26 guidance that expressly permits them to enter the service arrangements with schools  
27 and school districts at issue here. When Renaissance contracted with Plaintiffs’  
28 children’s schools, it was not foreseeable that Plaintiffs would later claim that these

1 common arrangements constituted a privacy violation (let alone that such claims  
2 could have any merit). Permitting this claim would thwart the edtech industry’s  
3 ability to provide services key to students’ educational experiences—an unfavorable  
4 outcome that counsels against an imposition of liability. *See Pelnar v. Rosen Sys.,*  
5 *Inc.*, 964 F. Supp. 1277, 1284 (E.D. Wis. 1997) (ruling for defendant on negligence  
6 claim where “public policy dictate[d] a limitation of liability” because imposing  
7 liability “would open up the possibility that no sensible or just stopping point exists”).

8 Additionally, “Wisconsin courts haven’t hesitated to preclude [negligence]  
9 liability when . . . there was an intervening cause with a more direct causal  
10 relationship to the harm.” *Dawson v. Great Lakes Educ. Loan Servs., Inc.*, No. 15-  
11 CV-475-JDP, 2022 WL 1500447, at \*6 n. 4 (W.D. Wis. May 12, 2022) (collecting  
12 cases), *aff’d*, No. 22-2189, 2025 WL 800237 (7th Cir. Mar. 13, 2025); *see Spierer v.*  
13 *Rossmann*, 798 F.3d 502, 510 (7th Cir. 2015) (noting that a “criminal act [by a third  
14 party] . . . breaks the causal chain between the alleged negligence and the resulting  
15 harm.”). Plaintiffs’ negligence claim is based at least partially on speculation that  
16 third parties *might* misuse data received from Renaissance. FAC ¶¶ 468, 474.  
17 However, Renaissance can lawfully make certain disclosures of student data to third  
18 parties, such as to “allow or improve operability and functionality[.]” *See* Cal. Bus.  
19 & Prof. Code § 22584(b)(4); *see* Section II.A. If any third parties subsequently  
20 misused the disclosed data, their (hypothetical) unlawful conduct would sever any  
21 causal link between Renaissance’s supposed negligence and the alleged damages to  
22 Plaintiffs.

23 Finally, Plaintiffs must plead “actual damages.” *Lemmermann v. Blue Cross*  
24 *Blue Shield of Wis.*, 713 F. Supp. 2d 791, 811 (E.D. Wis. 2010). Plaintiffs assert the  
25 “diminution in value of their intimate personal information.” FAC ¶ 484. As  
26 discussed *supra*, Section IV.D, this theory is nonviable given Plaintiffs’ own  
27 disinterest in participating in any currently existing market for internet users’ data.  
28 Moreover, Plaintiffs fail to explain what actual damages have resulted from “the

1 improper collection, exposure, [and] exploitation” of their personal information.  
2 FAC ¶ 484.

3 ***Second***, Plaintiffs’ attempt to plead a negligence *per se* claim based on  
4 Renaissance’s alleged COPPA violations, *id.* ¶ 477, is nonviable because that theory  
5 only applies under Wisconsin law to claims based on the defendant’s violation of a  
6 “safety statute”—which does not exist here.<sup>11</sup> Specifically, a *per se* instruction is  
7 available only in “a narrowly defined range of circumstances.” *Cooper v. Eagle*  
8 *River Mem’l Hosp., Inc.*, 270 F.3d 456, 460 (7th Cir. 2001). “In distinguishing  
9 ‘safety statutes’ from more general regulatory measures, ***plaintiffs must do more***  
10 ***than baldly assert that the statute in question protects a specific class of individuals.***  
11 All legislation promotes the public welfare to some degree. Instead, the legislation  
12 must evince a clear and unambiguous legislative desire to establish civil liability.”  
13 *Id.* (emphasis added). Wisconsin courts have held that even laws regulating the  
14 licensure of medical professionals do not qualify as “safety statutes” when there is  
15 no evidence of “legislative intent to grant a private right of action for a violation of  
16 the statute.” *Leahy by Heft v. Kenosha Mem’l Hosp.*, 348 N.W.2d 607, 612 (Wis. Ct.  
17 App. 1984).

18 As Plaintiffs themselves note, “COPPA does not contain an express private  
19 right of action.” FAC ¶ 473. Given that Congress has not authorized its private  
20 enforcement, COPPA would be deemed a “general regulatory measure,” rather than  
21 a “safety statute[.]” This means Plaintiffs do not (and cannot) state a negligence  
22 claim based on Renaissance’s alleged failure to comply with COPPA.

23  
24  
25 <sup>11</sup> A safety statute is a “legislative enactment designed to protect a specified class of  
26 persons from a particular type of harm.” *Totsky v. Riteway Bus Serv., Inc.*, 607 N.W.  
27 2d 637, 648–44 (Wis. 2000) (citation omitted) (“stop sign statute[, requiring vehicles  
28 to stop at stop signs,] is a safety statute, the violation of which constitutes negligence  
per se); see also *Johnson v. Blackburn*, 582 N.W.2d 488, 498 (Wis. Ct. App. 1998)  
(statute requiring installation of smoke detectors is a safety statute).

1           **H. Plaintiffs’ WDTPA Claim Should Be Dismissed (Count X)**

2           Plaintiffs’ Wisconsin Deceptive Trade Practices Act (“WDTPA”) claim fails  
3 for several reasons.

4           **First**, Plaintiffs cannot pursue a WDTPA claim because they and their children  
5 were “[a]t all relevant times” citizens and residents of California (FAC ¶¶ 25–26) and  
6 Kansas (*id.* ¶¶ 28–29), respectively, when they were exposed to Renaissance’s  
7 alleged misconduct—but the WDTPA “affords a remedy **only** to Wisconsin  
8 consumers[.]” *See Hydraulics Int’l, Inc. v. Amalga Composites, Inc.*, No. 20-CV-  
9 371, 2022 WL 4273475, at \*10 (E.D. Wis. Sep. 15, 2022) (emphasis added); *accord*  
10 *id.* at \*9 (“The only reasonable reading of the statute is that it applies only to  
11 Wisconsin consumers.”).

12           **Second**, the WDTPA prohibits parties from undertaking “untrue, deceptive, or  
13 misleading” conduct with the intent to “sell, distribute, increase the consumption of  
14 or in any [way] dispose of any real estate, merchandise, securities, employment,  
15 service, or anything offered by such person[.]” Wis. Stat. § 100.18(1). Per its plain  
16 language, the WDTPA applies only to “commercial transactions.” *Slane v. Emoto*,  
17 582 F. Supp. 2d 1067, 1083 (W.D. Wis. 2008); *see also Thermal Design, Inc. v. Am.*  
18 *Soc’y of Heating, Refrigerating & Air-Conditioning Eng’rs, Inc.*, 755 F.3d 832, 837  
19 (7th Cir. 2014) (noting that the WDPTA applies only to alleged misrepresentations  
20 made to “promote the sale of a product” (emphasis omitted; citation omitted)).  
21 Plaintiffs do not allege entering any commercial transaction with Renaissance,  
22 requiring dismissal.

23           **Third**, Plaintiffs fail to allege a “pecuniary loss,” which requires “a causal  
24 connection” between Renaissance’s statements and any alleged pecuniary loss  
25 Plaintiffs experienced. *Dusterhoft v. OneTouchPoint Corp.*, No. 22-cv-0882-BHL,  
26 2024 WL 4263762, at \*16 (E.D. Wis. Sept. 23, 2024). The FAC vaguely alleges that  
27 Renaissance’s alleged misrepresentations were made to “Plaintiffs...**and/or** their  
28 schools.” FAC ¶ 512 (emphasis added). However, Plaintiffs do not plausibly allege

1 that their children or they were “materially induced” to transact with Renaissance by  
2 the challenged statements. *Weaver v. Champion Petfoods USA Inc.*, 3 F.4th 927, 934  
3 (7th Cir. 2021) (noting that a WDTPA claim requires a showing of harm “*to the*  
4 *plaintiff*”) (emphasis added) (citation omitted). And even if Plaintiffs could  
5 demonstrate the requisite causal connection, for the reasons discussed *supra*, Section  
6 IV.D, Plaintiffs and their children have not suffered tangible economic injury from  
7 Renaissance’s alleged conduct.

8 **V. CONCLUSION**

9 For these reasons, the FAC should be dismissed in full. As Plaintiffs already  
10 amended once but failed to cure the many legal deficiencies identified previously,  
11 the Court should dismiss the FAC with prejudice, particularly as the fundamental  
12 theory underlying Plaintiffs’ complaint disregards an established regulatory regime  
13 specific to the school setting. *See, e.g., Hadley*, 243 F. Supp. 3d at 1089 n.1 (N.D.  
14 Cal. 2017) (dismissing with prejudice where “FAC failed to cure th[e] deficiency  
15 identified in [d]efendant’s motion to dismiss the original complaint.”).
